

THE COLOR ORANGE

BY: KEVIN ELIJAH PAGE

Thinking of Sarah Wimer

The Color Orange

In this unique story, readers will learn about three main and chosen things. The first thing I will be urging your interest in is about the color orange in the rainbow. The second thing is that orange is many people's favorite color. The last but not foremost will be that orange is the color of the University of Tennessee.

**KEEP
CALM
AND
LOVE
ORANGE**

The color orange is in the rainbow with all the other beautiful colors. A rainbow is actually raindrops with the sun's rays going through the rain and creating a color like orange. Orange is the combination of the colors red and yellow. When in the rainbow the color orange relieves boredom and helps to relax. According to Crystal Cure.com "the color orange represents creativity."

When you look at the world many people have favorite things. Well many people accept orange as their favorite color. Sarah Wimer a 7th grader at Booth School loves the color orange.

I agree with Sarah 100% of the way. People who love the color orange most likely has joy that overrules their sad emotions. Therefore, they will most likely be a very good friend. Sarah Wimer is like that everyday. Every time she laughs and I hear her I get a smile on my face. Even when i'm very mad and I have had a very bad day she makes me feel happy.

The color orange can also be a college's school color like the University of Tennessee. That college is the color orange everywhere and every way.

The University of Tennessee's Alumni first decided to go with the color orange because of its appearance. Orange was the school color in 1869 when the alumni agreed on it.

The first college to come up with its school color in Tennessee is UT in Knoxville in 1794. “The school is now one of the best schools in America.” replies my cousin Steven. Steven likes the color orange, he says, “It regenerates my youth inside of me.”

Orange among all the other colors, is a popular color. So when you look at colors remember that orange is a great color too. Don't just judge the color orange by its appearance, but look or research its meaning. You see I am very creative so orange fits me very well.

About the author:

Kevin is very creative he likes the color orange and hopes after you read this you will too. This story was actually written for someone.
